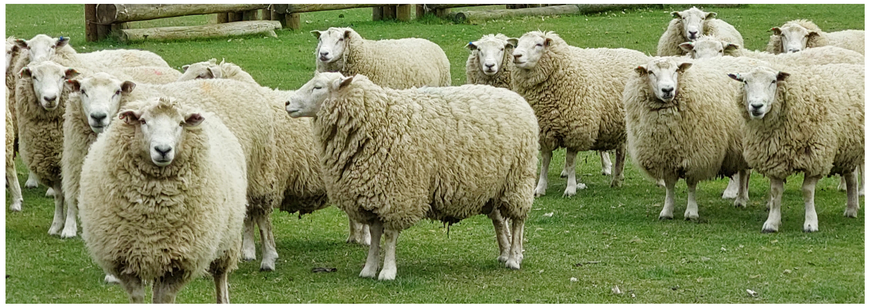
Our Snowline™ HALF BRED WOOL OPTION



Snowline™ $200+ rams - an example of the type of rams we have used over Brad and Peter Morton's half bred ewes.

Brad Morton and wool classer Kristian Bright checking the 23 mic half bred/Snowline™ hogget wool

Smallburn 1/2 bred/Snowline™ x inlamb ewe hoggets. 600 out of 1000 are in lamb.
For further information on this amazing Snowline™ / Halfbred cross please contact John McDonald.

Snowline™ $200

Carla Initiative for worm tolerance

We now have approximately 800 ewes scanned in lamb to 12 Snowline™ $200+ rams that all have a Carla reading of over 200 which is phenomenal.

The Carla results rating is based on 4 levels.

Level 1	No Carla
Level 2	Low Carla up to 1.0
Level 3	Medium Carla 1.1 to 5.0
Level 4	High Carla over 5.0

As Carla has an approximate heritability of 30% so on average before culling all ewe and ram lamb progeny should have an average Carla score of approx 60 so this is huge progress on worm tolerance.

We have just received information from AG research on Canadian sheep trials. The results are 2nd generation Carla lambs are 4.7% heavier in weaning weight than the controls.

Snowline™ & Ranger™ news

The main Snowline™ & Ranger™ news is - Jason and Tracey have sold "Cheddar Valley Station" and purchased "Elgin" in West Otago. Its a great property with 1182 hectares of mostly paddocks, and excellent tree lanes, and ranging in altitude from 370m -570 above sea level. The 6000 ewes scanned at just under 200% with only 1.6% dry, so they have adjusted to the shift really well. Jason's dogs are fatter with smaller blocks and hes skinnier (so he reckons) with lots more break fencing.

Snowline™ 2025

The Opportunity to become a $200+ Farmer and Client

The Snowline™ ewes in the photo below are the SHAPE, THICKNESS and YIELD that can produce **$200+ lamb returns.**

We have Snowline™ clients who are successfully using this opportunity now.

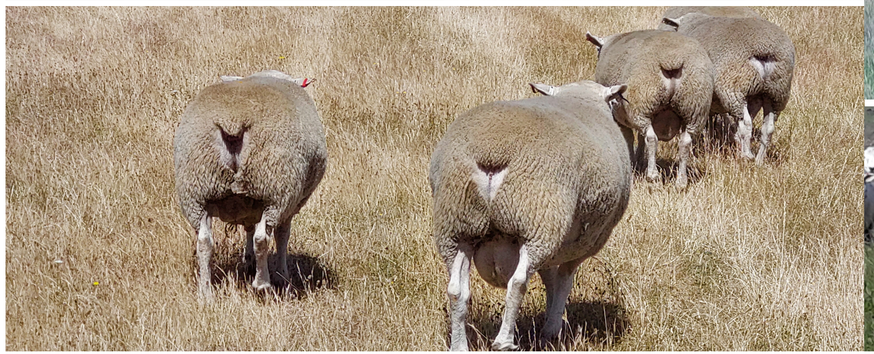
Example	18kg	23kg	25kg	Margin
$8.70 Schedule	$156	$200	$217	$60
$9.70 Schedule	$174	$223	$242	$67

Finance for cashflow C/A is now no longer a problem with several options. Initially you may decide to use this opportunity for a portion of your lambs. These opportunity margins could make a huge difference to your profit margin.

These Snowline ewes are run on the "Kinaston Run" Roxburgh, which are 50% of the $200+ equation opportunity. The other 50% of the equation are the Snowline Rams (on the next page)

Our Snowline™ RAMS

The simple opportunity to produce $200+ lamb returns. After 55 years of screening thousands of ewes and ewe hoggets we now produce what you see below. **Carcases** that give you the opportunity to produce $200+ lamb returns.



Snowline™ rams are ready for sale in November each year

Snowline™ BARE PATTERN

These Snowline™ Bare $200 + Genetics will also put you well down the line to minimal tailing. Yes these are all their natural tails not touched.

Snowline™ Bare $200+ R/H used over our barest ewes. Note the carcase and yield as well as the bare tails. These Snowline™ rams will get you to your breeding objective of minimal crutching and dagging quickly.

Snowline™ $200+ ewe hoggets at mating in May at "Cheddar Valley Station". You can see their width and depth to achieve Snowline™ $200+

Ranger™ SHEEP

Our Ranger sheep opportunity to take you to $200+

Ranger™ dark faced ewes on the Kinaston Run - Roxburgh

Our mixed aged Ranger™ sires (also bred for longevity as well as yield)

This years R/H at 8 months of age - approx 65-70kg
